ABOUT ALICE ASQUITH

Descended from a long line of creative women, Alice was surrounded by a passion for design, sewing, and beautiful, quality fabrics since early childhood – influenced by her mother, grandmother and great-grandmother who all designed and made their own beautiful clothes.

Asquith London was born 12 years ago out of Alice's desire for natural, elegant clothing in flattering styles and quality fabrics, which Alice felt just weren't available for yoga/leisurewear. With plenty of feedback from yoga and Pilates teachers and customers alike, Alice designs the collections with 'real' women in mind, and for all shapes and sizes.

Believing clothing trends, gimmicks or logos should never overpower the women wearing the clothes, Alice ensures that the Asquith label focuses on softest, quality jersey layering in flattering shapes and comfortable styles – offering a range that is feminine and elegant, not 'sporty' in feel, clothes that make the wearer feel good.

The pieces can be mixed and matched with existing wardrobe items giving women creative freedom and individual style.

ABOUT OUR FABRICS

Bamboo

- * Exquisitely soft and durable absorbs and evaporates sweat fast.
- * Moisture wicking. Naturally anti bacterial (therefore reducing skin irritations)
- * Lets your skin breathe and wicks moisture away from the body
- * Grown without the use of pesticides and chemicals
- * Retains colour, shape and lustre

Organic Cotton

- * Our organic cotton is from GOTS (Global Organic Textile Standard) certified sources, so you know the raw cotton has been farmed giving consideration to the environment without the use of pesticides and chemicals.
- * Organic cotton is said to benefit sufferers of skin problems such as eczema and psoriasis because it's free of irritating chemicals
- * Our clothing is ethically grown - the cotton growers and garment manufacturers are all paid a good wage, (no child labour here) and they work in safe, healthy environments.
- * Only low impact dyes and natural vegetable dyes can be used in certified organic cotton production, unlike dyes which conventional cotton manufacturers use
